

02-Connecting to MySQL (10 pts)

After completing chapter 2 from the textbook please complete this assignment

BUILD A FORM

1

Use what you learned from previous classes to build a web form. This form should include at least the following (you can modify the one from the previous unit):

- Three different input types (text, radio, dropdown, etc)
- Five different inputs

DATABASE

3

Create a MySQL database and add a table with columns that match your web form. Remember to create an ID that auto increments.

- Auto increment ID
- Columns for each form field

PHP CONNECTION

4

Build a php script that takes the form values and puts them in a database.

- Send the message
- Format the message so the variables are contained in a cohesive sentence.

BONUS

2

Make it look awesome by adding CSS, Google fonts, and styling that you learned in web essentials.

- Impress Me = 2
- Weak Attempt = 1
- No Attempt = 0
