

06-Securing the App

(15 pts)

After completing chapter 6 from the textbook please complete this assignment. Do NOT build a blog entry management system!

DISPLAY

3

Display the approved records.

- Each record needs to contain an id, date and three other columns as you see fit.
- Display only the approved records.
- Use a common variables file and global variables.
- Provide navigation to all the pages

ADD

2

Anyone can add a record.

- Build a page that adds a record to the database.
- Use a common variables file and global variables.
- Provide navigation to all the pages

APPROVE

4

Build an approval page.

- Create a protected page using HTTP1.1 that allows the admin to approve pages
- Use a common variables file and global variables.

DELETE

4

Build a delete page.

- Create a protected page using HTTP1.1 that allows the admin to delete pages
- Use a common variables file and global variables.

BONUS

2

Make it look awesome by adding CSS, Google fonts, and styling that you learned in web essentials.

- Impress Me = 2
- Weak Attempt = 1
- No Attempt = 0
