

07-Remember with Cookies (15 pts)

After completing chapter 7 from the textbook please complete this assignment. The textbook talks about sessions and you should read all about them. However, I do not require you to use sessions in this assignment. If people don't want to allow cookies on their computer, it's their loss and not my problem. *I know that's a poor attitude but every action has a consequence.*

NEW ACCOUNT

3

Build a login page that allows a user to create a new account in your database.

- First and Last name
- Username
- Double Password fields
- Checks to see if there is already a user with that username
- Upon successful login, it saves three cookies (username, first, last)

LOGIN

3

Build a login page that allows a user with an account to login.

- Username and Password fields
- Checks both username and password
- Use SHA encoding for the password
- Add option to create an account
- Add an option to return to the index page if they do not want to login

LOGOUT

1

Build a logout script that deletes the cookies.

- Set the date of all cookies to the past
- Auto return to the home page when complete.

PROTECTED PAGES

3

Build at least two additional pages that cannot be accessed unless a user is logged in.

- Protected page1 _____
- Protected page2 _____

WELCOME

3

Build a navigation bar that invited the user to login and sign out.

- Option to login when not logged in
- Option to sign out when signed in
- Displays the user name when logged in
- Displayed on all appropriate page

BONUS

2

Make it look awesome by adding CSS, Google fonts, and styling that you learned in web essentials.

- Impress Me = 2
- Weak Attempt = 1
- No Attempt = 0
